

Drive your business faster with specialist vehicle inspection and mobile solutions

autocheck

driving your leasing business faster

Benefits Realised

- More efficient charging through improving tracking of new & existing damage
- Faster invoicing through automatic update to your fleet management system as soon as an inspection is complete
- Lower overheads through reduced manual processes
- Increased productivity through more efficient job allocation
- Increased visibility of key operational processes
- Improved accuracy and reduced errors through menu driven inspection templates
- Improved customer service by automated report delivery and web tools

Do you experience delays in confirming and invoicing damage recharges at the end of a lease period due to manual processes?

Do your inspectors know what the existing damage is on a vehicle before they inspect it?

Does your current process allow you to tailor an inspection specific to the vehicle, motorcycle, or truck being inspected?

Do your inspectors consistently price new damage found during an inspection?

Increase turnaround times, improve customer service and optimise availability of stock by getting a faster, more complete picture of the state of returned vehicles through the implementation of AutoCheck.

AutoCheck can cater an inspection process for

- ✓ General motor vehicles
- ✓ Light commercials
- ✓ Motorcycles
- ✓ Trucks and other heavy commercial vehicles

Netresult Mobility provides mobile computing solutions that enable companies in the automotive industry to drive their business faster. Our solutions help all parts of the vehicle supply chain, from wholesale financiers right through to consumers, improving the speed and quality of their decisions about vehicles.

Netresult Mobility has customers across the UK, Australia and New Zealand including, Pickles Auctions, Carlins, Turners Auctions, and vehicle inspection services like the New Zealand Automobile Association, RACQ in Queensland and the NRMA in New South Wales, and wholesale vehicle financiers including Toyota Financial Services, St George Bank and GE Money.

AutoCheck is used to complete end of lease inspections for companies like FleetPartners, Lease Plan, Toyota Finance, and Orix across Australia and New Zealand.

Visit our website www.netresultmobility.com for more information.

Drive your business faster with specialist vehicle inspection and mobile solutions

Condition and damage tracking

- Vehicle images and photos used to indicate location and severity of damage.
- Automatically load existing damage from the previous inspection making it easier to identify new damage.
- Track and identify missing vehicle features and options.
- Add and remove defects from the web management portal after inspection has been completed on the PDA.
- Signature capture of the customer and inspector.

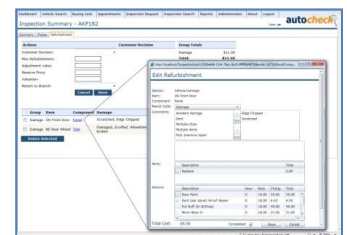

Inspection management

- Fully configurable inspection templates, damage descriptions, and repair price menus specific to the vehicle being inspected.
- Vehicle images for saloons, estates, light commercials, motorcycle, trucks and more.
- Ability to configure customer specific refurbishment pricing.
- Control the mandatory information required to complete the inspection.
- Versioning allows tracking of changes to an inspection after it has been released.

Integration & reporting tools

- Automatically load all known vehicle details based on registration.
- Integrate with your fleet management system for automatic upload of vehicle inspection and damage costs.
- Automatically deliver completed inspection reports via email or fax.
- Notification services for automatic requests to third party suppliers e.g. transportation services.
- Comprehensive management reporting including productivity and damage reclaim trend analysis.
- Automatically send vehicle details to your disposal website or remarketing company.
