

Driving your business faster

Typical Benefits

Increased productivity through more efficient job allocation and management

No more lost, forgotten or incomplete jobs

Less back office administration and no rekeying of data

Quicker handling of customer job enquiries, increased visibility of a jobs status

Better consistency and quality of data

"Our efficiency gains were blown off the scale. Assessors time is being spent more efficiently, as they're not searching through documents to find information - they have it right there in front of them on their PDAs"

Mike Gaudin
Clean Heat Project Manager,
Environment Canterbury

Do you have a mobile sales, service or franchise workforce?

Do you currently schedule your mobile staff using a spreadsheet, Outlook or a whiteboard?

Do you have several piles of printed job cards lying around the office and in vans?

Are your mobile staff operating at maximum efficiency? Are they spending too much time in the office?

Do you know the status of every job? Are there incomplete jobs, unbilled or forgotten jobs?

Are there complex processes that are specific to your business? Pricing, quoting, scheduling, interfaces to other systems?

Mobile Agenda is an easy to use, web based job management and scheduling solution with optional mobile component. It is designed to be easily customised to suit the individual needs of a business rather than a 'one size fits all approach'.

Mobile Agenda has been implemented into a wide and diverse range of business sectors. For example - local government; home heating and insulation; electrical contracting and accounting franchise to name but a few.

The Mobile Agenda job management solution can be operated 'stand alone' or tightly integrated with your existing accounting and other systems. In many cases the web interface provides the necessary functionality whereas in other cases the PDA mobile component delivers the competitive advantage.

Most of the Mobile Agenda solutions implemented have some form of customisation specific to the industry sector or client needs. This may be as simple as custom colours in the scheduling diary and reports or complex specific pricing and costing functionality.

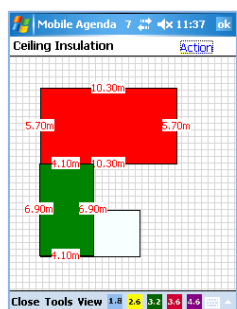

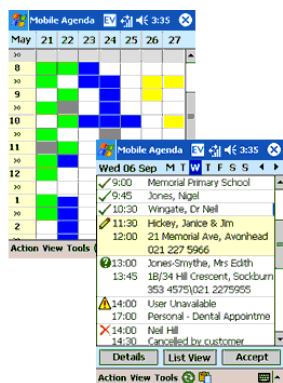

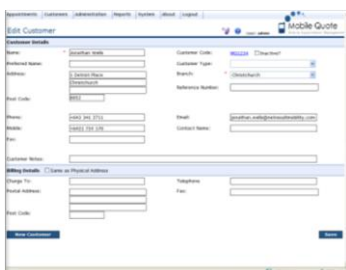

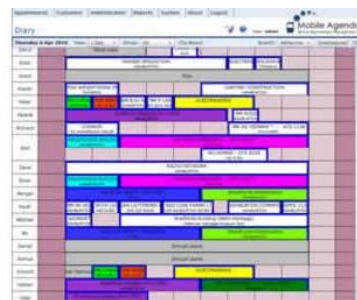

Netresult Mobility has customers across the UK, Australia and New Zealand. Visit our website www.netresultmobility.com for more information.

Driving your business faster with specialist job management solutions

Job Management Solution

Fully Managed, Web Based, Secure

- Accessible from anywhere in the world using an Internet browser
- No expensive server is required
- All software updates and new features are automatically available
- Peace of mind with a secure, maintained and backed-up database
- Role and branch based security

Flexible Scheduling

- Sophisticated scheduling screen with drag and drop rescheduling and reassignment
- Jobs can be scheduled over many days and assigned to multiple people. Scheduled tasks can be categorised e.g. quoting, installation, audit etc
- Multiple users can schedule safely at the same time
- Highly scalable to hundreds of users
- Configurable colour coded display to convey maximum information at a glance. Very suited to 'large screen' staff display.
- Time can be 'blocked out' at user and branch level
- Automatic creation of recurring jobs at regular intervals e.g. a regular 6 monthly service call

Other Functionality Highlights

- Easily integrated with Accredo, MYOB, and Quickbooks accounting systems
- Flexible reporting and data export functionality – PDF, MS Word and Excel formats
- Easily configured and customised to suit the individual and competitive needs of your business
- Simplified CRM functionality
- 'Over the air' deployment of new PDA software versions
- PDA works outside wireless coverage areas with efficient synchronisation when back in range
