

# Floor-plan auditing

## Benefits

Faster, more efficient audits

More timely results.

Vehicle manifests and audit results are communicated wirelessly in 'real time'

Lower overheads through reduced manual processes

More accurate vehicle valuations in charge-plan and overdraft audits

More collections and better management of risks

Powerful management information – easy analysis of trends, exceptions and performance measures

## Driving your floor plan auditing processes faster

Do you experience delays in finalising your floor plan audits?

Do you wish to complete more floor-plan audits with the same number of staff?

Do your auditors have the current manifest updated with the results of their inspection available in a professional form to enable a quick and objective reconciliation with the Dealer Principal?

Do you have easy access to the management information derived from historical audits and their trends to enable better targeting and management of the risk?

Mobile Auditor has been specifically designed to assist wholesale finance companies carrying out 'floor plan' audits of motor vehicle dealers, catering for bailed stock and flexible charge-plan / overdraft arrangements.

Mobile Auditor can greatly increase the efficiency of the end to end audit process from scheduling to payment collection and help manage the associated credit risks.

The Mobile Auditor solution can be operated 'stand alone' or tightly integrated with your existing wholesale stock management system.

Netresult Mobility has customers across the UK, Australia and New Zealand and Mobile Auditor is used to complete floor-plan audits for companies like Toyota Finance, St George Bank, Mercedes Benz, and GE Money

Visit our website [www.netresultmobility.com](http://www.netresultmobility.com) for more information.

*Driving your business faster with specialist vehicle inspection solutions*

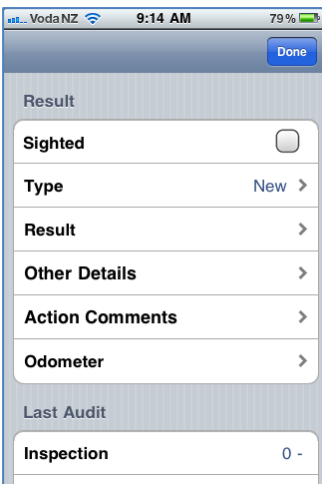

# Floor-plan auditing

## Quickly locate stock

- Current dealer manifest downloaded to the PDA immediately prior to starting the audit ensures the auditor has an accurate picture of dealer stock.
- Quickly locate stock as sighted so missing vehicles are identified as fast as possible.
- Search using VIN, registration, dealer stock number.
- Configurable exception types e.g. on-loan, on demo, at repairer, and sold.

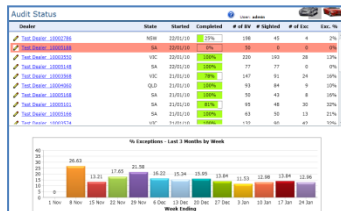

## Valuation and encumbrance tools

- Integrated with CAP, Glass's, and Rebook vehicle information services.
- Optional REVS, Experian, or HPI checks.

## Audit status immediately visible

- Auditors have a clear picture of the audit status.
- Drill down to specific vehicle lists: exceptions, sighted, and un-sighted vehicles.
- Vehicle exceptions either automatically emailed to dealer principle or printed directly from the PDA once the audit is complete.
- Single point of entry of audit details. Once the audit is complete it can be automatically uploaded to backend wholesale finance system.

## Integration & reporting tools

- Digital dashboard provides immediate and timely picture of all dealer auditors.
- Import of dealer manifest information can often reuse existing exports meaning minimum backend system changes.
- Automatic delivery of audit and exception reports via email.
- Extensive productivity and audit summary reports available.
